Drying

Kiln dried to 8-12% moisture content.

Coating

Marine grade 2-part polyurethane.

Technology

Advanced formula containing antimicrobials, UV inhibitors and catalyst components which help resist fading, chipping, and decay.

End-Matched

For a clean look and seamless transitions. Additionally, saving you time, money and reducing your total waste.

Thickness

Industry leading 3/4" board thickness for superior durability.

Moulding

Specialized high-end precision moulding achieving a consistent and clean re-sawn finish everytime.

Lengths

Random odd and even pieces, 4-16 feet.

Touch-Up Paint

Custom colour-matched touch-up kits available. Amounts required is dependant on the quantity of your order.

Nails/Staples

Every order is supplied with colour-matched coated nails to ensure a seamless look.

Hot-dip galvanized split-less siding nails 2 1/2" (5 lb box)

- single nailed - sufficient for 750 lineal ft. of siding
- double nailed - sufficient for 375 lineal ft. of siding

Hot-dip galvanized split-less trim nails 3 1/4" (5 lb box)

- double nailed - sufficient for 250 lineal ft. of trim

Staple Line

For a concealed, high-quality look.
